Hello Jim,

The ECM software in this car was introduced in Field Fix FF_DV2.0U5N_05_14 and was submitted to EPA on November 26, 2014 (Attached for your reference).

The TCM level was released with Field Fix FF_DV2.0U5N_03_14 and was submitted to EPA on March 25, 2014 (Attached for your reference).

Please let me know if you have any further questions.

Regards,

Greg Allen

Greg, can you or someone appropriate find out if these software levels are production or the recall fix? Carl in the other division is trying to figure what this test car has.

Jim,

I found out that you are the VW rep.

Can you tell me if this Jetta has been reflashed? Picture 20160229_115032.jpg indicated two modifications. Are they related to the exhaust emissions?

Do you have certifications for this 2013 Jetta 2.0L TDI?

I am trying to find a non reflashed vehicle for PEMS testing here to calibration remote sensing data that we have provided to CD (Linc and staff).

Thanks
